1. Executive Summary

What We're Building

The Projects section is where users embark on **Ayurvedic Health Transformation Journeys** — comprehensive, Twin-guided protocols for achieving specific health goals. It answers the fundamental question: "*How do I systematically address this health challenge using Ayurvedic principles?*"

This isn't a generic goal tracker with wellness features. It's a protocol-driven transformation system that:

Dimension	What We Offer	Why It Matters
Constitutional Foundation	Every project starts with understanding WHY this goal matters for THIS person	Generic protocols fail because they ignore individual constitution
Holistic	Projects span diet, lifestyle, supplements,	Ayurveda treats root causes, not
Twin-Guided	Active coaching, not passive tracking	Transformation requires guidance,
Outcome-	Track health metrics, not just days	Results matter more than adherence
Phased	Progressive protocols with clear milestones	Sustainable change happens in

Why It Matters

Most health apps set goals like "Sleep better" and track whether you meditated today. They don't address WHY you can't sleep (Vata imbalance? Pitta aggravation? Poor evening routine?), don't provide a comprehensive protocol addressing multiple factors, and don't adapt based on your progress.

Ayurveda has sophisticated protocols for specific health challenges — Nidra (sleep) protocols, Agni (digestive) restoration, Ama (toxin) reduction, Rasayana (rejuvenation) programs. These are multi-week, multi-faceted interventions that address root causes.

Key Differentiator

Generic goal app: "Goal: Sleep 8 hours. Today: □ Meditate □ No screens. Streak: 12 days."

AyuAware Projects: "Day 15 of your Nidra Protocol. Your difficulty falling asleep combined with elevated Vata suggests an overactive mind at bedtime. We're addressing this through: evening wind-down routine, Vata-calming foods, Ashwagandha supplementation, and Nadi Shodhana breathwork. Results so far: Sleep onset improved from 42 to 24 minutes, NSL score up from 68 to 82. Tonight's focus: adding warm milk with nutmeg to deepen the calming effect."

Protocol-driven. Personalized. Outcome-measured. Twin-guided.

2.2 Project Categories (Ayurvedic Framing)

Sleep & Recovery (Nidra):

Protocol	Focus	Durati	Key Interventions
Insomnia Protocol	Difficulty falling/staying asleep	4-6 weeks	Evening routine, Vata-calming herbs, breathwork
Sleep Quality Optimization	Improve depth and restfulness	3-4 weeks	Sleep hygiene, timing, supplementation
Jet Lag Recovery	Reset circadian rhythm	1-2 weeks	Light exposure, meal timing, grounding
Night Shift Adjustment	Adapt to irregular schedule	4-6 weeks	Modified Dinacharya, supplementation

Digestive Health (Agni):

Protocol	Focus	Duratio	Key Interventions
Agni Restoration	Weak digestive fire	4-6 weeks	Digestive spices, meal timing, specific foods
Bloating & Gas Relief	Vata-type digestive issues	3-4 weeks	Food combining, carminatives, lifestyle
Acid Reflux Protocol	Pitta-type digestive issues	4-6 weeks	Cooling foods, timing, herbs
Gut Health Reset	Comprehensive digestive reset	6-8 weeks	Elimination diet, probiotics, healing foods

Detox & Cleansing (Ama):

Protocol	Focus	Duratio	Key Interventions
Ama Reduction	Clear accumulated toxins	4-6 weeks	Kitchari cleanse, digestive support, lifestyle
Seasonal Cleanse	Panchakarma-lite	2-3 weeks	Modified cleansing, appropriate for season

Post-Illness Recovery	Rebuild after sickness	2-4 weeks	Gentle rebuilding, Rasayana
Digital Detox	Mental/sensory cleansing	1-2 weeks	Screen reduction, nature, meditation

Weight Management:

Protocol	Focus	Duration	Key Interventions
Sthaulya Protocol	Healthy weight loss	8-12 weeks	Kapha-reducing diet, movement, metabolism
Karshya Protocol	Healthy weight gain	8-12 weeks	Vata-nourishing diet, strength, rebuilding
Metabolic Reset	Optimize	4-6 weeks	Agni restoration, timing, movement
Post-Pregnancy Recovery	Postpartum restoration	8-12 weeks	Gentle rebuilding, nourishment

Fitness & Performance:

Protocol	Focus	Duration	Key Interventions
Constitutional Training	Exercise matched to Prakriti	8-12 weeks	Appropriate intensity, recovery, nutrition
Endurance Building	Marathon/long-distance prep	12-16 weeks	Progressive training, constitutional recovery
Strength Building	Muscle and strength	8-12	Appropriate training, protein, herbs
Sports Recovery	Recover from training/ injury	2-4 weeks	Rest, anti-inflammatory, rebuilding

Mental Wellness (Manas):

Protocol	Focus	Duratio	Key Interventions
Stress & Anxiety Protocol	Vata-type mental imbalance	4-6 weeks	Grounding, herbs, routine, breathwork
Focus & Concentration	Improve mental clarity	4-6 weeks	Brahmi, meditation, lifestyle
Emotional Balance	Pitta-type mental imbalance	4-6 weeks	Cooling, emotional practices, herbs
Burnout Recovery	Restore from exhaustion	6-8 weeks	Rest, Rasayana, gradual rebuilding

Skin & Beauty:

Protocol	Focus	Duration	Key Interventions
Skin Clarity Protocol	Clear skin issues	6-8 weeks	Diet, detox, topical care
Anti-Aging (Rasayana)	Rejuvenation	8-12 weeks	Rasayana herbs, practices, diet
Hair Health	Strengthen hair	6-8 weeks	Scalp care, nutrition, herbs

Constitutional Skincare	Dosha-appropriate care	4-6 weeks	Personalized routine

Immunity & Vitality (Ojas):

Protocol	Focus	Duration	Key Interventions
Ojas Building Protocol	Build vital essence	6-8 weeks	Rasayana, diet, lifestyle
Immune Strengthening	Enhance immunity	4-6 weeks	Herbs, diet, practices
Energy & Vitality Boost	Overcome fatigue	4-6 weeks	Address root cause, rebuild
Seasonal Immunity Prep	Prepare for season change	2-4 weeks	Seasonal adjustments, herbs

2.3 Design Philosophy

Constitutional Foundation Every project begins with assessment to understand WHY this goal matters for this person's unique constitution and current state.

Holistic Protocols Projects integrate multiple intervention types — not just "take this supplement" but comprehensive protocols spanning diet, lifestyle, supplements, and practices.

Twin-Guided Journey The Digital Twin is an active coach throughout the project — providing daily guidance, adjusting protocols based on progress, troubleshooting when things aren't working.

Outcome-Focused Success is measured by health metrics (NSL, CHI, dosha balance, specific outcomes) not just adherence. Did sleep actually improve? Did digestion get better?

Phased Approach Projects have clear phases (Foundation → Building → Optimization) with milestones, making progress tangible and preventing overwhelm.

Sustainable Transformation Focus on root causes and habit formation, not quick fixes. Projects end with maintenance protocols to sustain results.

3. User Journey Breakdown

3.1 Viewing Active Projects

Context: User opens Projects section with active projects.

Twin Message:

"You have 2 active projects. Your Nidra Protocol is showing great progress — sleep quality improved 23% this week! Ready to check in on your Marathon prep?"

Active Project Card (Collapsed):

```
┌──────────────────────────────────────────────────────────────────────────────┐

- 🧠 Mental Wellness (Manas)
- ✨ Skin & Beauty
- 🛡️ Immunity & Vitality (Ojas)
- 🎯 Custom Project

Step 2: Project Assessment

Context: User selects "Sleep Quality Optimization"

Twin Message:

"Before we begin, I need to understand your specific sleep challenges. This will help me customize the protocol for you."

Assessment Questions:

1. **Primary Challenge:**
    - ○ Difficulty falling asleep
    - ○ Waking up during the night
    - ○ Waking too early
    - ○ Not feeling rested despite sleeping
    - ○ Inconsistent sleep schedule
    - ○ Multiple issues
2. **Duration:**
    - ○ Less than 2 weeks (acute)

    - ○ 2 weeks - 3 months (short-term)
    - ○ More than 3 months (chronic)
3. **Timing:**
    - Go to bed: [Time picker]
    - Wake up: [Time picker]
    - Ideal wake: [Time picker]
4. **Previous Attempts:**
    - ☐ Melatonin or sleep supplements
    - ☐ Reducing screen time
    - ☐ Meditation or relaxation
    - ☐ Sleep tracking devices
    - ☐ Prescription medication
    - ☐ Nothing yet
5. **Additional Context:** (Optional text input)

Step 3: Protocol Preview & Confirmation

Twin Message:

"Based on your assessment, I've created a personalized Nidra Protocol. Your difficulty falling asleep combined with your Vata elevation suggests an overactive mind at bedtime. We'll focus on calming Vata through grounding evening routines and specific herbs."

Protocol Preview Card:

```
┌──────────────────────────────────────────────────────┐

│ • Screen curfew 2 hours before bed                   │
│ • Consistent sleep/wake times                        │
│ • Foot massage with warm oil                         │
│ • Bedroom environment optimization                   │
│                                                      │
│ 🍽️ Dietary Adjustments                               │
```

```
• Warm milk with nutmeg before bed
• Earlier, lighter dinners
• Avoid stimulants after 2 PM
• Grounding foods in evening

💊 Supplement Support
• Ashwagandha (evening)
• Brahmi (optional, for racing mind)
• Tagara (Valerian) if needed

🧘 Practices
• Nadi Shodhana before bed
• Body scan meditation
• Yoga Nidra sessions

──────────────────────────────────────────

EXPECTED OUTCOMES

Week 1-2: Establishing routine, initial
          improvements in sleep onset

Week 2-3: Deeper sleep, less waking,
          more consistent schedule

Week 3-4: Sustainable sleep patterns,
          improved daytime energy
```

Commitment Check:

```
⚠️ COMMITMENT CHECK

This protocol requires daily attention for
best results. Are you ready to commit to:

☑ Evening routine (20-30 min daily)
☑ Dietary adjustments
☑ Regular check-ins with me

I recommend starting on a Sunday or Monday
when you can establish the routine.

[← Customize Protocol]  [Start Project →]
```

3.3 Project Detail View

Context: User views active Nidra Protocol.

Twin Message:

"Day 15 — You're halfway there! Your sleep onset time has improved by 18 minutes. Tonight's focus: Let's add the warm milk ritual. Have you tried it yet?"

Progress Overview:

```
Day 15 of ~30
[▓▓▓
```

```
Morning Check-in

✓ Logged yesterday's sleep: 7h 12m
✓ Rated sleep quality: 7/10
```

Supplements for Project:

```
🌿 Ashwagandha - 300mg
Take with warm milk, 1 hour before bed
[Log] [Learn more] [Shop]
```

Dietary Focus:

```
This week: Warm, grounding evening meals

✓ Favor: Soups, stews, cooked vegetables
✗ Avoid: Raw foods, caffeine after 2 PM

[View meal suggestions]
```

3.4 Timeline View

Context: User swipes to Timeline tab.

Phase Display:

```
PHASE 1: Foundation (Days 1-7) ✓ Complete
```

```
✓ Establish consistent bedtime
✓ Begin evening wind-down routine
✓ Remove screens from bedroom
✓ Start Ashwagandha
```

```
PHASE 2: Building (Days 8-21) ← You are here
```

```
✓ Add foot massage routine
✓ Introduce breathing exercises
○ Add warm milk ritual (Day 15)  ← Today
○ Deepen meditation practice (Day 18)
○ 21-day habit milestone (Day 21)
```

```
PHASE 3: Optimization (Days 22-30)
```

```
○ Fine-tune based on results
○ Reduce supplement if sleeping well
○ Establish maintenance routine
○ Final assessment & graduation
```

Milestones:

```
🎯 MILESTONES

✓ Day 1: Protocol started
✓ Day 7: First week complete
✓ Day 10: Sleep onset improved
○ Day 21: Habit lock-in (6 days away)
○ Day 30: Protocol graduation
```

3.5 History View

Context: User views project history.

│ ▓▓▓
```

Maintenance Protocol:

```
🔄 MAINTENANCE PROTOCOL

To maintain your results, I recommend:

Daily (Non-negotiable):
• Keep 10 PM bedtime
• Evening wind-down (can be shorter)

3-4x per week:
• Foot massage
• Warm milk ritual

As needed:
• Ashwagandha (during stressful periods)
• Nadi Shodhana (when Vata rises)

[Add maintenance to my routine]
```

3.7 Edge Cases

Pausing a Project:

Twin Message:

"I understand — life happens. Let's pause your Nidra Protocol.

Would you like to: • Pause for a specific time (1 week, etc.) • Pause indefinitely (resume when ready) • Scale back to maintenance mode • End the project (we'll save progress)

There's no judgment here — sustainable change matters more than perfect streaks."

Project Not Progressing:

Twin Message:

"I've noticed your sleep metrics haven't improved much in the past week. Let's troubleshoot together.

A few questions: • Are you finding the evening routine difficult to maintain? • Has something changed (stress, travel)? • Would you like to adjust the protocol?

[Let's talk about it] [Adjust my protocol] [I need a break]"

Too Many Active Projects:

Twin Message:

"You already have 3 active projects. From an Ayurvedic perspective, trying to change too much at once can aggravate Vata and lead to burnout.

I recommend completing or pausing one project before starting another.

[View active projects] [Start anyway (not recommended)]"

4.5 Protocol Generation Algorithm

```
PROTOCOL GENERATION:

Inputs:
- Template (category, typical structure, interventions)
- Assessment responses (specific challenges, context)
- User constitution (Prakriti, Vikriti)
- Current health metrics (relevant scores)
- Season (affects recommendations)
- User preferences (restrictions, past attempts)

Process:

1. SELECT BASE PROTOCOL
   - Match template to user's specific challenge
   - Adjust duration based on severity (acute/chronic)

2. CONSTITUTIONAL CUSTOMIZATION
   - For Vata imbalances → Add grounding, routine, warmth
   - For Pitta imbalances → Add cooling, moderation, calm
   - For Kapha imbalances → Add stimulation, lightness,
movement
   - Adjust intensity based on constitution

3. PERSONALIZE INTERVENTIONS
   - Lifestyle: Match to user's schedule, capabilities
   - Diet: Match to preferences, restrictions
   - Supplements: Match to constitution, avoid
contraindications
```

```
   - Practices: Match to experience level, available time

4. STRUCTURE PHASES
   - Phase 1 (Foundation): Essential habits, easiest wins
   - Phase 2 (Building): Add complexity, deepen practice
   - Phase 3 (Optimization): Fine-tune, prepare for
maintenance

5. DEFINE MILESTONES
   - Day 7: First week complete
   - Day 14/21: Habit formation checkpoint
   - Day 21+: Outcome assessment
   - Final day: Graduation

6. SET OUTCOME METRICS
   - Primary: Main goal metric (e.g., NSL for sleep)
   - Secondary: Supporting metrics (e.g., Vata balance)
   - Subjective: User-reported outcomes

7. GENERATE DAILY TASKS
   - Morning tasks
   - Daytime tasks
   - Evening tasks
   - Phase-specific additions

Output:
- Complete protocol structure
- Daily task schedule
- Supplement recommendations
- Dietary guidelines
- Expected outcomes timeline
- Maintenance protocol skeleton
```

5. AI Integration & Prompting Strategy

5.1 The Role of Claude in Projects Section

Claude serves as a transformation coach and protocol designer:

Capability	Description
Protocol Generation	Create personalized protocols from templates + assessment
Daily Guidance	Provide contextual guidance based on progress and metrics

Troubleshooting	Identify why progress isn't happening, suggest adjustments
Adaptation	Modify protocols based on user feedback and results
Motivation	Celebrate milestones, encourage during challenges
Completion Analysis	Summarize achievements, create maintenance plans

5.2 System Prompt for Projects Section

```
You are the Ayurvedic Digital Twin for AyuAware, serving as a
transformation coach and protocol designer. Your role is to
guide
users through comprehensive Ayurvedic health protocols,
providing
daily guidance, troubleshooting when things aren't working,
and
celebrating progress.

## YOUR ROLE IN THIS SECTION

You are a protocol coach. You design personalized health
protocols,
guide users through multi-week transformations, track
outcomes (not
just adherence), and adapt protocols based on results. You're
not a
passive tracker — you're an active guide.

## PROTOCOL DESIGN PRINCIPLES

Ayurvedic protocols address root causes:
- Sleep issues often stem from Vata imbalance (racing mind)
- Digestive issues relate to Agni strength
- Weight issues connect to Kapha accumulation or Vata
depletion
- Mental wellness ties to dosha balance and lifestyle

Protocols are multi-faceted:
- Lifestyle adjustments (routine, sleep, environment)
- Dietary changes (foods, timing, preparation)
- Supplement support (herbs matched to constitution)
- Practices (breathwork, meditation, movement)

Protocols are phased:
- Foundation: Establish basic habits, easiest interventions
```

- Building: Add complexity, deepen practice
- Optimization: Fine-tune, prepare for maintenance

OUTCOME FOCUS

Track health metrics, not just adherence:
- NSL (sleep quality) for sleep protocols
- CHI (health index) for general wellness
- Agni score for digestive protocols
- Dosha balance for all protocols
- Subjective reports for qualitative outcomes

Success = measurable improvement in target metrics, not perfect adherence.

CONSTITUTIONAL CONTEXT

Always consider user's constitution:
- Vata types: Need more structure, routine, grounding
- Pitta types: Need moderation, cooling, avoiding intensity
- Kapha types: Need stimulation, lightness, motivation

Current Vikriti affects protocol design:
- Elevated Vata: Add extra calming, grounding elements
- Elevated Pitta: Add cooling, reduce intensity
- Elevated Kapha: Add more stimulation, movement

COMMUNICATION APPROACH

Daily guidance:
- Acknowledge where they are in the protocol
- Note recent progress or concerns
- Give specific focus for today
- Encourage without being saccharine

When troubleshooting:
- Be curious, not judgmental
- Explore what's not working
- Offer specific adjustments
- Validate that transformation is hard

When celebrating:
- Be genuinely enthusiastic
- Highlight specific achievements
- Connect to their original goal

```
- Look forward to what's next

## WHAT NOT TO DO

- Don't create overwhelming protocols (start simple)
- Don't ignore constitutional context
- Don't focus only on adherence (outcomes matter)
- Don't be preachy or judgmental about missed days
- Don't make protocols that conflict with user's lifestyle
- Don't recommend protocols without proper assessment
- Don't allow too many concurrent projects (max 2-3)
```

5.3 Context Building for Projects Section

Every Claude call includes:

```
CONTEXT PACKAGE STRUCTURE:

## User Profile
- Name: {user_name}
- Prakriti: {prakriti_percentages}
- Current Vikriti: {vikriti_percentages}
- Current imbalances: {imbalance_list}
- Health scores: {CHI, NSL, Agni, Ojas, etc.}

## Project Context
- Project name: {project_name}
- Project type: {category}
- Start date: {start_date}
- Current day: {day_number} of {estimated_duration}
- Current phase: {phase_name}
- Phase progress: {percentage}

## Assessment Data
- Original challenge: {assessment_summary}
- Severity: {acute/short-term/chronic}
- Previous attempts: {what_they_tried}
- Additional context: {user_notes}

## Protocol Summary
- Lifestyle interventions: {lifestyle_list}
- Dietary adjustments: {diet_list}
- Supplements: {supplement_list}
- Practices: {practice_list}

## Progress Data
```

```
- Overall adherence: {percentage}
- Recent adherence (7 days): {percentage}
- Tasks completed today: {list}
- Tasks pending today: {list}

## Health Metrics
- Target metric: {metric_name}
- Baseline: {starting_value}
- Current: {current_value}
- Change: {delta}
- Secondary metrics: {other_changes}

## Recent History
- Last 7 days adherence: {day_by_day}
- Recent check-in notes: {notes}
- Any reported issues: {issues}

## Specific Request
- What user is asking/doing: {query_context}
```

5.4 Prompt Templates by Scenario

Protocol Generation:

```
Generate a personalized {protocol_type} protocol for this
user.

{CONTEXT_PACKAGE}

Assessment Responses:
{assessment_data}

Generate a complete protocol including:

1. **Protocol Overview**
   - Name and focus
   - Duration (with reasoning)
   - Intensity level
   - Primary approach (which dosha focus)

2. **Why This Protocol for Them**
   - Connect to their constitution
   - Address their specific challenge
   - Note any considerations

3. **Protocol Components**
```

Lifestyle Adjustments:
- List 4-6 specific changes
- Include timing and duration
- Prioritize by importance

Dietary Adjustments:
- What to favor (with reasons)
- What to avoid (with reasons)
- Specific meal suggestions

Supplement Support:
- Primary supplement (with dosage, timing)
- Optional supplements (if needed)
- Constitutional considerations

Practices:
- Daily practices
- As-needed practices
- Duration and timing

4. **Phases**

Phase 1 (Foundation) - Days 1-{x}:
- Focus
- Key tasks introduced
- Success criteria

Phase 2 (Building) - Days {x}-{y}:
- Focus
- New additions
- Success criteria

Phase 3 (Optimization) - Days {y}-{z}:
- Focus
- Fine-tuning
- Graduation criteria

5. **Expected Outcomes**
- Week 1-2 expectations
- Week 2-3 expectations
- Week 3-4 expectations

6. **Metrics to Track**
- Primary metric

```
   - Secondary metrics
   - Subjective indicators

7. **Daily Task Structure**
   - Morning tasks
   - Evening tasks
   - Phase-specific additions

Be specific and actionable. Match intensity to their
experience level.
```

Daily Guidance:

```
Generate daily guidance for this user in their active
project.

{CONTEXT_PACKAGE}

Generate a message that:

1. **Acknowledges Their Position**
   - Day X of protocol
   - Current phase
   - Recent progress

2. **Notes Health Metrics** (if available)
   - How target metric is trending
   - What this means

3. **Today's Focus**
   - What to prioritize today
   - Any new additions (if phase transition)
   - Specific encouragement

4. **Contextual Tip**
   - Based on their recent adherence
   - Or seasonal relevance
   - Or constitutional consideration

Tone: Coaching, specific, encouraging without being
saccharine
Length: 3-5 sentences
```

Troubleshooting:

```
The user is having trouble with their project. Help
troubleshoot.
```

```
{CONTEXT_PACKAGE}

Issue: {specific_problem}
Recent adherence: {adherence_data}
Recent metrics: {metric_changes}

Generate a troubleshooting response that:

1. **Validates the Difficulty**
   - Acknowledge transformation is hard
   - Be non-judgmental

2. **Explores Root Cause**
   - Ask 2-3 specific questions
   - Based on their specific situation

3. **Offers Specific Adjustments**
   - 2-3 concrete modifications
   - Ranked by impact/ease

4. **Provides Options**
   - Continue with adjustments
   - Scale back temporarily
   - Pause if needed

Tone: Curious, supportive, solution-oriented
```

Project Completion:

```
Generate a completion summary for this finished project.

{CONTEXT_PACKAGE}

Generate a celebration and summary including:

1. **Celebration**
   - Enthusiastic acknowledgment
   - Specific to their achievement

2. **Results Achieved**
   - Primary metric: before → after
   - Secondary metrics: changes
   - Subjective improvements

3. **Overall Success Rating**
   - Excellent / Good / Moderate / Partial
```

- Brief explanation

4. **Habits Established**
   - List of habits now in place
   - Which are most important to maintain

5. **Adherence Summary**
   - Overall percentage
   - Brief note on consistency

6. **Maintenance Protocol**
   - Daily (non-negotiable) practices
   - Weekly practices
   - As-needed practices
   - When to return to full protocol

7. **Looking Forward**
   - Suggestion for next project (if appropriate)
   - Or encouragement to maintain

Tone: Celebratory, specific, forward-looking

Project Recommendation:

Recommend a project for this user based on their current state.

{CONTEXT_PACKAGE}

User's goals (if stated): {goals}
Current concerns: {concerns}

Generate a recommendation that:

1. **Primary Recommendation**
   - Specific protocol name
   - Why it's perfect for them NOW
   - Expected duration

2. **How It Addresses Their Needs**
   - Constitutional fit
   - Current imbalance relevance
   - Goal alignment

3. **What to Expect**
   - Brief overview of approach

```
   - Commitment level
   - Expected outcomes

4. **Alternative Options** (if relevant)
   - 1-2 other good fits
   - Brief reason for each

Tone: Confident recommendation with clear reasoning
```

6. Data Models & State Management

6.1 Core Data Types

Project:

```
Project:
  - id: string
  - userId: string
  - name: string
  - type: ProjectType
  - templateId: string | null (null for custom)
  - status: 'active' | 'paused' | 'completed' | 'abandoned'

6.2 State Structure

```
ProjectsState:
  # Visit Context
  - isFirstVisit: boolean
  - lastVisit: Date | null

  # Projects Lists
  - activeProjects: Project[]
  - completedProjects: CompletedProject[]
  - isLoadingProjects: boolean
  - projectsError: Error | null

  # Active Project Detail
  - selectedProject: Project | null
  - isLoadingProject: boolean
  - detailView: 'overview' | 'timeline' | 'history' |
'settings'

  # Create Flow
  - createFlowStep: 'select' | 'assess' | 'preview' |
'confirm' | null
  - selectedTemplate: ProjectTemplate | null
  - selectedSubTemplate: SubTemplate | null
  - assessmentResponses: AssessmentResponse[]
  - generatedProtocol: Protocol | null
  - isGeneratingProtocol: boolean

  # Templates
  - templates: ProjectTemplate[]
  - recommendations: ProjectRecommendation[]
  - isLoadingTemplates: boolean

  # UI State
  - expandedProjectCards: string[]
  - logModalOpen: boolean
  - logModalProjectId: string | null
  - scrollPosition: number
```

```
  # Chat
  - messages: ProjectMessage[]
  - isTyping: boolean
```

6.3 State Management Approach

Zustand Stores:

```
Stores:

1. projectsStore
   - Active and completed projects
   - Project CRUD operations
   - Progress logging
   - Metric tracking

2. protocolStore
   - Templates and sub-templates
   - Protocol generation
   - Phase transitions
   - Task management

3. createProjectStore
   - Create flow state
   - Assessment responses
   - Protocol preview
   - Confirmation

4. projectDetailStore
   - Selected project
   - Detail views
   - History data
   - Timeline data

5. projectsUIStore
   - View states
   - Modal states
   - Messages
   - Scroll position
```

7. Component Requirements

7.1 Projects List Components

ProjectsHeader

Section header with Twin message:

- Twin avatar with contextual message
- Summary of active projects
- Create new project button

ActiveProjectCard

Project overview card:

- Project icon and name
- Subtitle/focus
- Day X of Y indicator
- Progress bar
- Health impact summary (key metrics)
- Today's focus
- Action buttons: [View] [Log] [Ask]

CompletedProjectCard

Completed project summary:

- Checkmark icon
- Project name
- Completion date
- Results achieved (brief list)
- Action buttons: [View Summary] [Maintenance]

7.2 Create Flow Components

TemplateSelector

Browse and select project templates:

- Recommended section (AI-suggested)
- Category sections (expandable)
- Template cards with descriptions
- Custom project option

CategorySection

Expandable category:

- Category icon and name
- Sub-template list when expanded
- Brief descriptions

SubTemplateCard

Individual protocol option:

- Name and description
- Typical duration
- Start button

AssessmentForm

Collect assessment data:

- Question rendering by type
- Single/multiple choice
- Time pickers
- Text inputs
- Progress indicator
- Validation

ProtocolPreview

Show generated protocol:

- Overview section
- Components breakdown
- Phases summary
- Expected outcomes
- Commitment check
- Customize/Start buttons

7.3 Project Detail Components

ProjectDetailHeader

Project header:

- Back button
- Project name
- Settings/overflow menu
- Tab navigation (Overview, Timeline, History, Settings)

ProgressOverviewCard

Progress visualization:

- Day X of Y
- Progress bar
- Current phase name
- Next milestone

HealthImpactCard

Metrics display:

- 2x2 grid of key metrics
- Before → after values
- Change indicators (↑↓)
- Dosha balance bar

TodayTasksCard

Daily tasks list:

- Task group headers (Evening Routine, Morning Check-in)
- Checkboxes for each task
- NEW badge for newly introduced tasks
- Log button

SupplementsForProjectCard

Project supplements:

- Supplement name and dose
- Timing instructions
- Action buttons: [Log] [Learn] [Shop]

DietaryFocusCard

Dietary guidance:

- This week's focus
- Favor list
- Avoid list
- Link to meal suggestions

LearnResourcesCard

Educational links:

- Relevant articles
- Technique guides
- Background information

7.4 Timeline Components

PhaseCard

Protocol phase display:

- Phase name and date range
- Status (complete, current, upcoming)
- Task list with checkboxes
- Expand/collapse

MilestoneList

Milestone tracker:

- Milestone name
- Target day
- Status indicator (✓, ○)
- Achieved date if complete

7.5 History Components

WeeklyAdherenceChart

Weekly view:

- Day bars with percentage
- Sleep/outcome value per day
- Weekly average

MetricTrendChart

Line chart for metric over time:

- Y-axis: metric value
- X-axis: weeks
- Current value highlighted
- Change annotation

7.6 Completion Components

CompletionCelebration

Celebration display:

- Confetti animation
- Congratulations message
- Achievement summary

ResultsAchievedCard

Final results:

- Metric comparisons (before → after)
- Check marks for achieved
- Success rating

HabitsEstablishedCard

Habits summary:

- List of established habits
- Importance indicators

MaintenanceProtocolCard

Maintenance guidance:

- Daily practices
- Weekly practices
- As-needed practices
- Add to routine button

7.7 Animation Requirements

Animation	Duration	Easing	Trigger
Card expand	400ms	ease-out	Tap project card
Progress bar fill	600ms	ease-out	Progress update
Metric change	400ms	ease-out	New metric value
Task complete	300ms	ease-out	Check task
Phase transition	500ms	ease-out	Enter new phase
Milestone achieved	600ms	bounce	Reach milestone
Completion celebration	1500ms	ease-out	Complete project
Confetti	2000ms	—	Completion
Create flow slide	300ms	ease-out	Next step

8. API Requirements

8.1 REST Endpoints

Get Active Projects:

```
GET /api/v1/projects/active

Response:
{
  "projects": [
    {
      "id": "proj_001",
      "name": "Nidra Optimization Protocol",
      "type": "nidra",
      "status": "active",
      "startDate": "2026-01-05",
      "currentDay": 15,
      "estimatedDuration": 30,
      "currentPhase": "Building",
      "progress": {
        "overall": 52,
        "adherence": 84
      },
      "healthImpact": {
        "primary": {
          "name": "Sleep Quality",
          "change": "+23%",
          "baseline": 68,
          "current": 82
        },
        "secondary": [
          { "name": "Vata Balance", "status": "Improving" }
        ]
      },
      "todayFocus": "Evening wind-down routine"
    },
    ...
  ]
}
```

Get Project Detail:

```
GET /api/v1/projects/:projectId

Response:
```

```
{
  "project": {
    "id": "proj_001",
    "name": "Nidra Optimization Protocol",
    "type": "nidra",
    "status": "active",
    "startDate": "2026-01-05",
    "estimatedDuration": 30,
    "assessment": { ... },
    "protocol": {
      "name": "Vata-Calming Sleep Restoration",
      "focus": "Calming overactive mind for better sleep",
      "duration": 30,
      "intensity": "moderate",
      "phases": [ ... ],
      "components": {
        "lifestyle": [ ... ],
        "dietary": [ ... ],
        "supplements": [ ... ],
        "practices": [ ... ]
      },
      "expectedOutcomes": [ ... ]
    },
    "progress": {
      "currentDay": 15,
      "currentPhase": "Building",
      "phaseProgress": 58,
      "overallProgress": 52,
      "adherenceRate": 84,
      "recentAdherence": 86,
      "milestones": [ ... ]
    },
    "metrics": {
      "primary": { ... },
      "secondary": [ ... ],
      "subjective": [ ... ]
    }
  }
}
```

Get Project Templates:

```
GET /api/v1/projects/templates

Response:
{
```

```
  "templates": [
    {
      "id": "tpl_nidra",
      "category": "nidra",
      "name": "Sleep & Recovery",
      "icon": "🌙",
      "subTemplates": [
        {
          "id": "sub_insomnia",
          "name": "Insomnia Protocol",
          "description": "Address difficulty falling or
staying asleep",
          "typicalDuration": { "min": 28, "max": 42 }
        },
        ...
      ]
    },
    ...
  ],
  "recommendations": [
    {
      "templateId": "sub_stress",
      "name": "Stress & Anxiety Protocol",
      "reason": "Based on your elevated Vata and recent
stress patterns",
      "priority": "high"
    }
  ]
}
```

Get Assessment Questions:

```
GET /api/v1/projects/templates/:subTemplateId/assessment

Response:
{
  "subTemplate": {
    "id": "sub_sleep_quality",
    "name": "Sleep Quality Optimization"
  },
  "questions": [
    {
      "id": "q1",
      "text": "What's your primary sleep challenge?",
      "type": "single",
      "options": [
```

```
        "Difficulty falling asleep",
        "Waking up during the night",
        ...
      ],
      "required": true
    },
    ...
  ]
}
```

Create Project:

```
POST /api/v1/projects/create

Request:
{
  "templateId": "sub_sleep_quality",
  "assessment": {
    "responses": [
      { "questionId": "q1", "value": "Difficulty falling
asleep" },
      ...
    ]
  },
  "startDate": "2026-02-01",
  "customizations": { ... } // optional
}

Response:
{
  "project": {
    "id": "proj_002",
    "name": "Sleep Quality Optimization",
    "protocol": { ... },
    "startDate": "2026-02-01",
    ...
  },
  "integrations": {
    "tasksCreated": 12,
    "supplementsAdded": 2,
    "practicesLinked": 3
  }
}
```

Log Daily Progress:

```
POST /api/v1/projects/:projectId/log
```

```
Request:
{
  "date": "2026-01-20",
  "tasksCompleted": ["task_001", "task_002", "task_003"],
  "tasksSkipped": ["task_004"],
  "notes": "Felt really tired today",
  "metrics": {
    "sleepDuration": 7.5,
    "sleepQuality": 7,
    "energyLevel": 6
  }
}

Response:
{
  "success": true,
  "updatedProgress": {
    "currentDay": 16,
    "adherenceRate": 83,
    "streakDays": 5
  },
  "milestoneAchieved": null,
  "phaseTransition": null
}
```

Get Project Timeline:

```
GET /api/v1/projects/:projectId/timeline

Response:
{
  "phases": [
    {
      "id": "phase_1",
      "name": "Foundation",
      "startDay": 1,
      "endDay": 7,
      "status": "complete",
      "tasks": [
        { "id": "task_001", "name": "Establish consistent
bedtime", "status": "complete" },
        ...
      ]
    },
    {
      "id": "phase_2",
```

```
      "name": "Building",
      "startDay": 8,
      "endDay": 21,
      "status": "current",
      "currentDayInPhase": 8,
      "tasks": [ ... ]
    },
    ...
  ],
  "milestones": [
    { "id": "m1", "name": "Protocol started", "day": 1,
"status": "achieved" },
    { "id": "m2", "name": "First week complete", "day": 7,
"status": "achieved" },
    { "id": "m3", "name": "Habit lock-in", "day": 21,
"status": "upcoming" },
    ...
  ]
}
```

Get Project History:

```
GET /api/v1/projects/:projectId/history?period=week

Response:
{
  "period": "2026-01-14 to 2026-01-20",
  "dailyLogs": [
    {
      "date": "2026-01-14",
      "day": 10,
      "adherence": 95,
      "sleepDuration": 7.75,
      "sleepQuality": 8
    },
    ...
  ],
  "weeklyAverage": {
    "adherence": 82,
    "sleepDuration": 7.2,
    "sleepDurationChange": "+25 min from Week 1"
  },
  "metricTrend": {
    "metricName": "NSL",
    "dataPoints": [
      { "week": 1, "value": 58 },
```

```
      { "week": 2, "value": 72 },
      { "week": 3, "value": 82 }
    ],
    "totalChange": "+24 points"
  }
}
```

Pause Project:

```
POST /api/v1/projects/:projectId/pause

Request:
{
  "pauseType": "temporary" | "indefinite" | "maintenance",
  "resumeDate": "2026-02-01" | null,
  "reason": "travel"
}

Response:
{
  "success": true,
  "project": {
    "status": "paused",
    "pausedAt": "2026-01-20",
    "resumeDate": "2026-02-01"
  }
}
```

Complete Project:

```
POST /api/v1/projects/:projectId/complete

Response:
{
  "completedProject": {
    "projectId": "proj_001",
    "completionDate": "2026-02-04",
    "totalDays": 30,
    "overallAdherence": 84,
    "resultsAchieved": [
      { "metric": "Sleep Onset", "before": "42 min", "after":
"15 min", "achieved": true },
      { "metric": "NSL Score", "before": "58", "after": "86",
"achieved": true },
      ...
    ],
    "habitsEstablished": [
      "Consistent 10 PM bedtime",
```

```
      "Evening wind-down routine",
      ...
    ],
    "successRating": "excellent",
    "maintenanceProtocol": {
      "daily": ["Keep 10 PM bedtime", "Evening wind-down"],
      "weekly": ["Foot massage 3-4x", "Warm milk 3-4x"],
      "asNeeded": ["Ashwagandha during stress", "Nadi
Shodhana when Vata rises"]
    },
    "summary": "Congratulations! You've successfully
completed..."
  }
}
```

8.2 WebSocket Events (Optional)

```
WebSocket Events:

project.phase_transition
{
  "projectId": "proj_001",
  "previousPhase": "Foundation",
  "newPhase": "Building",
  "message": "You've entered Phase 2: Building!"
}

project.milestone_achieved
{
  "projectId": "proj_001",
  "milestone": "First week complete",
  "day": 7,
  "message": "Milestone achieved: First week complete!"
}

project.metric_update
{
  "projectId": "proj_001",
  "metric": "NSL",
  "previousValue": 72,
  "newValue": 82,
  "message": "Your sleep quality score improved!"
}
```

9. Success Metrics

9.1 Project Engagement Metrics

Metric	Target	Measurement
Projects started	> 30%	Users who start at least 1 project
Active projects per user	1-2	Average concurrent projects
Daily engagement	> 60%	Users who log progress daily
Section visits	> 3/ week	Project section visits per user

9.2 Project Completion Metrics

Metric	Target	Measurement
Completion rate	> 50%	Projects completed vs. started
Average completion time	Within 20% of estimate	Actual vs. estimated duration
Abandonment rate	< 30%	Projects abandoned after Day 7
Pause recovery rate	> 60%	Paused projects resumed

9.3 Adherence Metrics

Metric	Target	Measurement
Daily adherence	> 70%	Tasks completed vs. scheduled
Weekly adherence	> 65%	Weekly average adherence
Phase completion	> 80%	Phases completed on schedule
Streak maintenance	> 5 days	Average streak length

9.4 Outcome Metrics

Metric	Target	Measurement
Primary metric improvement	> 60%	Projects with measurable improvement
Success rating	> 70% "Good" or better	Project success ratings
Maintenance adoption	> 40%	Users who adopt maintenance protocol
Repeat engagement	> 30%	Users who start second project

9.5 Technical Metrics

Metric	Target	Measurement
Protocol generation time	< 3s	Time to generate personalized protocol
Project load time	< 1s	Time to load project detail
Log submission time	< 500ms	Time to confirm logged progress
Template load time	< 1s	Time to load template browser
Error rate	< 1%	Failed operations

10. Implementation Considerations

10.1 Protocol Generation

AI Generation Approach:

- Use Claude to generate personalized protocols from templates
- Include user constitution, assessment, and current state
- Generate complete protocol structure in one call
- Allow user customization before starting

Caching Strategy:

- Cache generated protocols
- Only regenerate if user requests changes
- Store protocol snapshots (don't regenerate mid-project)

10.2 Integration with Other Sections

Today Section Integration:

- Push daily tasks to Today section
- Project tasks appear in Today's agenda
- Logging in Today updates project progress

Supplements Integration:

- Add project supplements to stack
- Link supplement tracking to project
- Remove from stack when project completes (optional)

Nutrition Integration:

- Link dietary guidance to Food Guide
- Suggest meals aligned with project
- Track dietary adherence

Lifestyle Integration:

- Add practices to routine
- Track practice completion for project
- Maintain practices post-project

10.3 Metric Tracking Integration

Health Metrics:

- Pull NSL, CHI, Agni, Ojas from Health section
- Auto-update project metrics when health data updates
- Show trends over project duration

Wearable Data:

- Import sleep data for sleep projects
- Import activity data for fitness projects
- Use as objective outcome measures

10.4 Notification System

Daily Reminders:

- Morning: Today's project tasks
- Evening: Log reminder (if not logged)
- Custom timing based on protocol

Milestone Notifications:

- Phase transitions
- Milestone achievements
- Metric improvements

Troubleshooting Triggers:

- Low adherence alerts (internal, not to user)
- Metric plateau detection
- Trigger proactive Twin check-ins

10.5 Offline Handling

When Offline:

- View active projects from cache
- Log daily progress (queue for sync)
- View protocol and tasks
- Cannot create new projects

When Back Online:

- Sync queued logs
- Update metrics
- Refresh project state
- Check for phase transitions

10.6 Accessibility Requirements

Screen Reader:

- Project status announced
- Progress percentages read
- Task completion confirmed
- Phase transitions announced

Motor Accessibility:

- Large tap targets for task checkboxes
- Swipe to complete tasks
- Voice input for notes

Visual Accessibility:

- WCAG AA contrast
- Progress bars with text labels
- Color + icon for status
- Support Dynamic Type

10.7 Analytics Events

Event	Properties	Purpose
`projects_opened`	source, active_count	Track entry
`project_created`	template_id, type	Creation tracking
`project_started`	project_id, type	Start tracking
`project_viewed`	project_id, view	Engagement
`progress_logged`	project_id, adherence	Adherence
`phase_entered`	project_id, phase	Progression
`milestone_achieved`	project_id, milestone	Achievement
`project_paused`	project_id, reason	Retention
`project_resumed`	project_id, pause_duration	Retention
`project_completed`	project_id, success_rating	Completion
`project_abandoned`	project_id, day, reason	Churn
`maintenance_adopted`	project_id	Post-completion

10.8 Testing Priorities

Unit Tests:

- Protocol generation logic
- Phase transition calculations
- Adherence calculations
- Metric tracking

Integration Tests:

- Full create project flow
- Daily logging with Today sync
- Supplement integration
- Metric updates from Health

E2E Tests:

- Create project from template
- Complete 7-day project simulation
- Pause and resume flow
- Project completion and maintenance

Manual QA:

- Protocol relevance and personalization
- Daily guidance quality
- Troubleshooting appropriateness
- Completion summary accuracy
- Integration correctness (Today, Supplements, etc.)

Appendix A: Project Template Reference

Sleep & Recovery (Nidra)

Protocol	Duration	Focus	Primary Metric
Insomnia Protocol	4-6 weeks	Sleep onset, staying asleep	NSL
Sleep Quality Optimization	3-4 weeks	Deep, restorative sleep	NSL
Jet Lag Recovery	1-2 weeks	Circadian reset	Sleep timing
Night Shift Adjustment	4-6 weeks	Irregular schedule adaptation	Energy levels

Digestive Health (Agni)

Protocol	Duration	Focus	Primary Metric
Agni Restoration	4-6 weeks	Strengthen digestive fire	Agni score
Bloating & Gas Relief	3-4 weeks	Vata digestive balance	Symptom frequency
Acid Reflux Protocol	4-6 weeks	Pitta digestive balance	Symptom severity
Gut Health Reset	6-8 weeks	Comprehensive restoration	Digestive symptoms

Mental Wellness (Manas)

Protocol	Duration	Focus	Primary Metric
Stress & Anxiety Protocol	4-6 weeks	Calm Vata, ground mind	HRV, self-reported
Focus & Concentration	4-6 weeks	Mental clarity	Focus tests
Emotional Balance	4-6 weeks	Cool Pitta, stabilize	Mood tracking
Burnout Recovery	6-8 weeks	Restore vitality	Energy, Ojas

Appendix B: Phase Structure Reference

Typical 30-Day Protocol Phases

Phase	Days	Focus	Key Activities
Foundation	1-7	Establish basics	Core habits, essential supplements
Building	8-21	Add complexity	Additional practices, deeper habits
Optimization	22-30	Fine-tune	Adjust based on results, prepare maintenance

Phase Transition Criteria

Transition	Criteria
Foundation → Building	Day 7 reached, basic habits established
Building → Optimization	Day 21 reached, habits solidified
Optimization → Complete	Day 30 reached, outcomes achieved

Milestone Examples

Day	Milestone	Significance
1	Protocol started	Commitment made
7	First week complete	Foundation established
14	Two weeks in	Habit formation beginning
21	Habit lock-in	Habits solidified (21-day rule)
30	Protocol graduation	Transformation complete

Appendix C: Integration Reference

Today Section Integration

Project Task Type	Today Section Display
Morning tasks	Morning block
Daytime tasks	Wellness block
Evening tasks	Evening block
Supplements	Supplement reminders
Practices	Practice recommendations

Supplement Stack Integration

Action	Behavior
Project created	Add project supplements to stack
Dose logged	Update both stack and project
Project completed	Offer to keep or remove from stack
Project paused	Keep in stack (with note)

Health Metrics Integration

Metric	Source	Usage
NSL	Health section	Sleep project outcome
CHI	Health section	Overall wellness outcome
Agni	Health section	Digestive project outcome
Ojas	Health section	Vitality project outcome
HRV	Wearable	Stress project outcome
Sleep data	Wearable	Sleep project objective

End of Document
