AyuAware Exposure Section - Complete Visual Specification

Hybrid Chat + Card Design

Overview

The Exposure section tracks external environmental factors that influence the user's health according to Ayurvedic principles. It integrates real-time environmental data (weather, air quality, light exposure) with natural cycles (lunar phases) and optional astrological influences (planetary transits).

Design Philosophy

Environmental Awareness Through Conversation + Cards:

- Twin contextualizes environmental data with personal impact
- Shows how current conditions affect user's specific constitution
- Provides actionable recommendations based on exposures
- Educational content woven naturally
- Progressive disclosure: essential data → detailed metrics → optional astrology
- Links to protocols and shop items where relevant

Information Architecture

```

Color Palette

Environmental Conditions

- **Good Conditions**: `#4A9B8E` (teal/green)
- **Moderate Conditions**: `#F8C471` (gold)
- **Poor Conditions**: `#E89B7F` (coral/red)
- **Severe Conditions**: `#D64545` (red)

Elements

- **Weather**: `#7AB8AC` (soft teal)
- **Air Quality**: `#A3B899` (sage green)
- **Light/Sun**: `#F8C471` (gold)
- **Moon**: `#B8A8E1` (lavender)
- **Planetary**: `#A8B5B1` (neutral gray)

Dosha Impact Colors

- **Vata Aggravating**: `#7AB8AC` (light teal)
- **Pitta Aggravating**: `#E89B7F` (coral)
- **Kapha Aggravating**: `#A3B899` (sage green)

Typography

Same as Health section:

- **Section Title**: 24px, weight 700
- **Card Title**: 18px, weight 600
- **Large Metrics**: 32px, weight 700
- **Body Text**: 15px, weight 400, line-height 22px
- **Small Text**: 13px, weight 400
- **Button Text**: 15px, weight 600
- **Label**: 12px, weight 600, uppercase

Part 1: Entry Flow

1.1 Entry from Insights Hub

User taps "Exposure" card from Insights hub

```
← Exposure                                  🔍  ⚙️
```

Header Specifications:

- Height: 56px + safe area
- Background: `#FFFFFF`
- Border bottom: 1px solid `#E0EBE8`
- Shadow: `0 1px 3px rgba(0,0,0,0.04)`

1.2 First-Time Entry Experience

For first-time visitors:

```
[🪷]

  Your environment plays a huge role
  in your health. Let me show you
  what's affecting you today.

Just now
```

```
[🪷]

  💡 What is Exposure?
  ──────────────────────────────

  In Ayurveda, your external environment
  directly influences your internal state.

  I track three key exposures:

  🌤️ Environment
  Weather, air quality, light levels

  🌙 Lunar Cycles
  Moon phases and their health impacts
```

```
🪐 Planetary Influences (Optional)
Astrological transits and timing

These factors affect your doshas and
can aggravate or pacify imbalances.

        [Got it! →]

Just now
```

1.3 Returning User Entry

```
[🪷]

Let's see what environmental factors
are affecting you today...

Just now
```

Part 2: Environmental Overview Card

2.1 Today's Impact Card (Collapsed)

```
[🪷]

🌤️ Today's Environmental Impact
──────────────────────────────────

    [Weather Icon]
  Warm, Humid, Partly Cloudy

Impact on You:
⚠️ This weather may aggravate Pitta

Why: High heat and humidity increase
internal heat, possibly causing

```

Your Location: Dharamsala, India
Last Updated: 5 minutes ago

⚠️ Impact on Your Constitution:

Pitta Aggravation Likely

Why: High heat (28°C) combined with humidity (81%) creates excess internal heat. For your Pitta-predominant constitution, this can trigger:

- Irritability and short temper
- Skin inflammation or rashes
- Increased appetite and thirst
- Digestive upset (acid reflux)
- Disturbed sleep quality

Detailed Conditions:

🌡️ Temperature: 28°C
Feels like: 32°C (heat index)
Status: Warm (Pitta-aggravating)

💧 Humidity: 81%
Status: High (Kapha-aggravating)
Dewpoint: 24°C

🌬️ Air Quality: AQI 44
Status: Good (Safe to be outdoors)
Primary pollutant: PM2.5

🌤️ Weather Pattern:
Partly cloudy, 20% chance of rain
Wind: 8 km/h from SW
Pressure: 1013 hPa (stable)

Recommendations for Today:

✓ Stay in shade during peak sun (12-3pm)

```
✓ Drink cooling beverages (coconut water)
✓ Wear light, breathable clothing
✓ Avoid spicy, heating foods
✓ Practice cooling pranayama (Sheetali)
✓ Apply cooling oils (coconut, sunflower)

[Create Weather Protocol →]
[View 7-Day Forecast →]
[Shop Cooling Products →]
[Collapse ↑]
```

Condition Blocks:

- Each metric in its own subsection
- Icon + Value + Status + Details
- Color-coded status indicators

Recommendations:

- Checkbox list format
- Actionable, specific suggestions
- Prioritized by importance

Part 3: Light Exposure Card

3.1 Light Exposure Card (Collapsed)

```
[🪷]

  Light exposure affects your
  circadian rhythm and Ojas. Here's
  today's light environment:

Just now
```

```
[🪷]

☀️ Light Exposure

[Sun Arc Visualization]
```

```
🌅 Sunrise: 6:41 AM
🌇 Sunset: 7:42 PM

Current UV Index: Low (2)
Lux Level: 1,000 lux

💡 Insight: Good time for outdoor
exposure without sun protection

[See Full Details ↓]

Just now
```

Sun Arc Visualization:

- Type: Curved arc showing sun's path
- Current position marked
- Sunrise and sunset times labeled
- Color: Gradient from gold to orange
- Size: Full card width, 100px height

3.2 Light Exposure Card (Expanded)

```
☀️ Light Exposure & Circadian Health
═══════════════════════════════════

[Sun Arc Visualization]

Daylight Hours Today: 13h 1m
═══════════════════════════════════

🌅 Sunrise: 6:41 AM
Best time for: Morning exercise, meditation
Brahma Muhurta: 5:11 AM - 6:41 AM

🌇 Sunset: 7:42 PM
Best time for: Evening routine, dinner prep
Twilight: 7:42 PM - 8:12 PM

UV Index Throughout Day:
═══════════════════════════════════
```

[Line Chart Showing UV Curve]

Current: 2 (Low)
Peak Today: 7 (High) at 1:00 PM

UV Protection Needed: 11 AM - 3 PM

Light Intensity (Lux):

Current: 1,000 lux
Category: Overcast day / Office lighting

For reference:
- Direct sunlight: 32,000-100,000 lux
- Indirect daylight: 10,000-25,000 lux
- Office lighting: 320-500 lux
- Home lighting: 50-150 lux

💡 Impact on Your Health:

Circadian Rhythm:
Your light exposure is moderate. For optimal circadian health, aim for:

- Morning sun exposure (30 min before 9am)
- Bright light during day (>1000 lux)
- Dim lights evening (<100 lux after 8pm)
- Complete darkness for sleep

Vitamin D Production:
Current UV levels allow 15-20 minutes of sun exposure for adequate Vitamin D.

Ojas (Vitality) Impact:
Balanced light exposure supports Ojas.
Too much sun depletes, too little weakens.

Recommendations:

✓ Get 15 min morning sun (before 9 AM)
✓ Work near windows during day
✓ Use sunscreen if outdoors 11 AM - 3 PM

```
✓ Dim lights 2 hours before bed
✓ Avoid screens after sunset (use filters)

[Create Circadian Protocol →]

```

Part 4: Today's Focus Card

4.1 Actionable Checklist Card

```
[🪷]

  Based on today's conditions, here
  are the most important things to
  focus on:

Just now
```

```
[🪷]

🎯 Today's Focus
═══════════════════════════════

Priority Actions for Your Health:

□ Take Vitamin D After Lunch
   UV is low, supplement recommended

□ Stay Hydrated (3 Glasses of Water)
   High humidity increases Kapha

□ Do Re-Fueling 11:45-Bradworth
   Optimal digestion window

□ Limit Conversation to Lower Stress
   Waning moon reduces vitality
```

```

```
🌙 Lunar Influence

      [Moon Phase Visualization]

Current Phase:
Waning Crescent Moon

Impact: May reduce vitality

This phase can lower natural energy
and Ojas. Focus on rest and gentle
activities.

          [See Full Details ↓]

Just now
```

Moon Phase Visualization:

- Size: 100x100px
- Accurate visual representation of current phase
- Subtle glow effect
- Label below: Phase name

5.2 Lunar Card (Expanded)

```
🌙 Lunar Influence on Your Health

      [Moon Phase Visualization]

Current Phase: Waning Crescent
Day 26 of 29 in lunar cycle
Next New Moon: In 3 days (Feb 3)

💡 What This Phase Means:

The Waning Crescent is a time of rest
and renewal before the new lunar cycle.
Energy naturally decreases as the moon
```

wanes, preparing for the fresh start of the New Moon.

Impact on Your Doshas:

🌊 Vata: Stable
Waning phases calm Vata's tendency toward excess movement and anxiety

🔥 Pitta: Reduced (Favorable)
Pitta naturally decreases during waning, reducing inflammation and intensity

🌍 Kapha: Slightly Elevated
Lower energy may increase Kapha heaviness - stay gently active

Health Effects I'm Seeing:

✓ Lower natural energy (not pathological)
✓ Desire for introspection and rest
✓ Reduced appetite (body needs less fuel)
✓ Better for finishing vs. starting projects
✓ Sleep may be deeper and longer

Ayurvedic Perspective:

The moon governs Kapha and water element in the body. As it wanes, so does our strength (Bala) and Ojas (vitality).

This is nature's way of encouraging rest and introspection. Honor this rhythm.

Full Lunar Cycle (This Month):

[Visual: 8 Moon Phase Icons]

🌑 New Moon → 🌓 First Quarter →
🌕 Full Moon → 🌗 Last Quarter → 🌘 Now

```
Recommendations for This Phase:
═══════════════════════════════════

✓ Prioritize rest and sleep (9+ hours)
✓ Gentle yoga and walking (no intense work)
✓ Complete ongoing projects vs. new starts
✓ Practice meditation and reflection
✓ Lighter meals (body needs less)
✓ Limit social commitments
✓ Journal and release what no longer serves

Supplements to Support:
• Ashwagandha for rest and recovery
• Magnesium for deep sleep
• Brahmi for calm introspection

[Create Moon Phase Protocol →]
[View Full Lunar Calendar →]
[Shop Moon Cycle Support →]
[Collapse ↑]
```

Lunar Cycle Visualization:

- 8 moon phase icons showing full cycle
- Current phase highlighted
- Can tap to see future/past phases
- Shows approximate dates

Part 6: Planetary Influence Card (Optional)

6.1 Planetary Card (Collapsed)

```
[🪷]

  For those interested in Vedic
  astrology, planetary positions also
  influence health:

Just now
```

```
[🪷]

🪐 Planetary Influence (Optional)
═══════════════════════════════

      [Astrological Symbol]

Current Transits:
☉ Sun in Gemini
♄ Saturn in Transit

Impact: Mercury rules Gemini,
affecting communication and mind.
Saturn's transit may bring lessons.

         [See Full Details ↓]
         [Disable Planetary Info]

Just now
```

Note: "Disable Planetary Info" allows users to opt out of astrological content if not interested.

6.2 Planetary Card (Expanded)

```
🪐 Planetary Influence on Your Health
═══════════════════════════════════

[Astrological Chart/Symbol]

💡 Vedic Astrology Perspective:
═══════════════════════════════

In Vedic astrology (Jyotish), planetary
positions influence your physical and
mental state through subtle energies.

Current Major Transits:
═══════════════════════════════

☉ Sun in Gemini (Mithuna)
```

Gemini is ruled by Mercury (Budha), planet of communication and intellect.

Effects on You:
- Mental activity increases
- Communication becomes important
- Restlessness may arise (Vata)
- Scattered thoughts possible

Health Recommendations:
- Practice focused meditation
- Limit multitasking
- Ground yourself with routine
- Warm, nourishing meals

♄ Saturn in Transit (Shani)

Saturn brings lessons through structure and discipline. This transit may feel restrictive but teaches important lessons.

Effects on You:
- Need for discipline and routine
- Joint/bone issues may surface (Vata)
- Melancholy or introspection
- Slow but steady progress

Health Recommendations:
- Strengthen bones (calcium, Vit D)
- Regular oil massage for joints
- Patience with health goals
- Consistent routines are beneficial

Timing Considerations:

Favorable Times Today:
- 6:00 AM - 8:00 AM (Good for meditation)
- 12:00 PM - 1:00 PM (Good for meals)
- 6:00 PM - 7:00 PM (Good for light work)

Unfavorable Times (Rahu Kala):

```
• 3:00 PM - 4:30 PM (Avoid important acts)

[View Your Birth Chart →]
[Create Astrological Protocol →]
[Disable Planetary Info]
[Collapse ↑]
```

Important Note: Planetary section is **optional** and can be disabled. Some users may prefer purely Ayurvedic approach without astrology.

Part 7: Educational Content Integration

7.1 Educational Info Cards

These appear contextually based on user interaction or first time viewing:

```
[🪷]

💡 How Does Weather Affect You?
──────────────────────────────

In Ayurveda, external weather directly
influences your internal doshas:

🌡️ Heat → Increases Pitta
Can cause inflammation, irritability

💨 Cold & Dry → Increases Vata
Can cause anxiety, dryness

💧 Cold & Wet → Increases Kapha
Can cause sluggishness, congestion

By understanding these patterns, you
can adjust diet and lifestyle to stay
balanced regardless of weather.

        [Got it!]
```

```
Just now
```

Part 8: Protocol Creation & Shop Integration

8.1 Protocol Creation Flow

When user taps "Create Weather Protocol":

```
[🪷]

  Let me create a protocol to help
  you balance today's warm, humid
  weather...

Just now
```

```
[🪷]

  🌤️ Pitta-Balancing Weather Protocol
  ═══════════════════════════════════

  🍽️ Nutrition
  ═══════════════════════════════════
  • Favor cooling foods (cucumber, mint)
  • Drink coconut water throughout day
  • Avoid spicy, fried, fermented foods
  • Eat at regular times (not when heated)

  [View Cooling Meal Ideas →]

  💊 Supplements
  ═══════════════════════════════════
  • Aloe Vera juice (cooling)
  • Brahmi (calms Pitta mind)
  • Coconut oil capsules

  [Shop Cooling Supplements →]
```

🧘 Lifestyle

- Stay in shade 12-3 PM
- Cool shower in evening
- Practice Sheetali pranayama (cooling)
- Wear light, loose clothing
- Coconut oil massage before bed

Duration: Use while hot weather lasts
Difficulty: Easy

[Save to My Protocols] [Start Now →]

Part 9: Navigation & Flow Patterns

9.1 Complete Scroll Experience

User scrolls through Exposure section in this order:

1. Today's Environmental Impact Card (collapsed)
2. Light Exposure Card (collapsed)
3. Today's Focus Checklist Card
4. Lunar Influence Card (collapsed)
5. Planetary Influence Card (collapsed - optional)
6. Educational cards (contextual)

Users can:

- Tap any card to expand inline
- Check off Today's Focus items
- Create protocols from any card
- Access shop from relevant cards
- Disable planetary info if not interested

9.2 Refresh Behavior

Data Updates:

- Weather: Every 30 minutes

- AQI: Every hour
- UV/Lux: Every 15 minutes
- Moon phase: Daily
- Planetary: Daily

Pull-to-Refresh:

- Updates all real-time data
- Shows "Updated just now" indicator
- Haptic feedback on release

9.3 State Persistence

Remember:

- Which cards are expanded
- Scroll position
- Today's Focus completion state
- Planetary info enabled/disabled preference

Part 10: Mobile Specifications

Spacing & Layout

- Same as Health section
- Screen margins: 16px
- Card padding: 20px (collapsed), 24px (expanded)
- Vertical spacing: 16px between cards

Typography

- Same scale as Health section

Touch Targets

- Minimum: 44x44px
- Checkboxes: 44x44px tap area
- Info icons: 44x44px tap area

Colors

- Defined in color palette section

Part 11: Desktop Adaptations

Layout

- Max width: 800px
- Centered

- Increased margins: 24px

Multi-Column Layout

- On wide screens, Today's Focus can appear alongside Environmental Impact
- Side-by-side layout for efficient scanning

Part 12: Development Priority

Phase 1 (MVP):

- Environmental Impact card
- Light Exposure card
- Today's Focus checklist
- Basic protocol creation
- Weather API integration

Phase 2:

- Lunar Influence card
- Advanced recommendations
- Shop integration
- Historical weather data

Phase 3:

- Planetary Influence card (optional feature)
- Astrological timing
- Advanced predictions
- Comparative analysis

Part 13: Component Library

Core Components:

1. `EnvironmentalOverviewCard` - Main conditions display
2. `LightExposureCard` - UV/Lux/Circadian
3. `TodaysFocusCard` - Actionable checklist
4. `LunarCard` - Moon phase display
5. `PlanetaryCard` - Astrological info
6. `WeatherMetricRow` - Reusable metric display
7. `ChecklistItem` - Interactive checkbox item
8. `SunArcVisualization` - Sun path chart
9. `MoonPhaseViz` - Moon phase display
10. `ProtocolCard` - Environment-based protocols

Part 14: API Endpoints

```
GET /exposure/current
  Returns: All current environmental data

GET /exposure/weather
  Returns: Weather conditions

GET /exposure/aqi
  Returns: Air quality data

GET /exposure/light
  Returns: UV, lux, sunrise/sunset

GET /exposure/lunar
  Returns: Current moon phase and influence

GET /exposure/planetary
  Returns: Astrological data (if enabled)

GET /exposure/forecast
  Query: ?days=7
  Returns: Weather forecast

POST /exposure/protocols/create
  Body: { type: 'weather' | 'lunar' | 'planetary' }
  Returns: Personalized protocol

PATCH /exposure/focus/complete
  Body: { itemId, completed: boolean }
  Returns: Updated focus list

PATCH /exposure/preferences
  Body: { planetaryEnabled: boolean }
  Returns: Updated preferences
```

Part 15: Testing Checklist

- [ ] All real-time data loads correctly
- [ ] Weather API integration working
- [ ] Cards expand/collapse smoothly
- [ ] Today's Focus checkboxes functional
- [ ] Lunar phase displays accurately
- [ ] Planetary info can be disabled

- [ ] Protocol creation works
- [ ] Shop integration loads products
- [ ] Educational content appears contextually
- [ ] Refresh updates all data
- [ ] State persists on return
- [ ] Performance smooth (60fps)
- [ ] Touch targets adequate
- [ ] Accessibility labels present
- [ ] Works with location services
- [ ] Handles API failures gracefully

This complete specification provides everything needed to build the Exposure section with the hybrid chat + card approach, integrating environmental awareness with Ayurvedic principles.
