Your current workout detail is actually quite good! Let's enhance it with more Ayurvedic context:

```
← Back                                  Morning Run
```

[🪷 Twin Avatar]

This run cleared morning sluggishness (Kapha) and sharpened your focus.

The timing was perfect - morning exercise during Kapha time (6-10 AM) helps prevent heaviness throughout the day.

🏃 MORNING RUN

AYURVEDIC SCORE

💡 AYURVEDIC INSIGHT

Your heart rate averaged 142 bpm with a 165 bpm peak, which means your stride and breath were fairly steady - small tweaks to pace will improve recovery further.

🔄 RECOVERY RECOMMENDATION

Cool down for 5 minutes, have oats with

soaked almonds, and sip water to keep Vata balanced.

Avoid cold drinks immediately after - they'll disturb your Agni.

Here's your lifestyle overview for the week. You're building good momentum with morning rituals - let's work on consistency with evening practices.
