Hybrid Chat + Card Design

Overview

The Nutrition section guides users toward eating that balances their constitution, supports their Agni (digestive fire), and aligns with Ayurvedic principles. It goes beyond calorie counting to focus on food qualities, meal timing, mindful eating, and dosha-appropriate choices.

Design Philosophy

Ayurvedic Nutrition Through Conversation + Cards:

- Twin teaches Ayurvedic nutrition principles naturally
- Focus on food qualities (hot/cold, heavy/light, dry/oily) not just macros
- Constitutional eating (what suits YOUR body type)
- Agni compatibility (can your digestive fire handle this?)
- Meal timing optimization (when your Agni is strongest)
- Mindful eating practices (how you eat matters)
- Seasonal and weather-based guidance
- Easy logging with AI-powered photo recognition
- Links to recipes, meal plans, and shop

Overall Dosha Balance from Food:

[Larger Tri-Color Dosha Chart]

Vata: 35% (balanced)
Pitta: 45% (slightly elevated)
Kapha: 20% (balanced)

⚠️ Insight: Today's food is slightly Pitta-aggravating. The ramen's salt and heat increased Pitta. Consider cooling dinner options.

Agni Compatibility: 78/100

Good! Most foods today suit your digestive fire. The ramen was heavy and challenging (score: 46), but breakfast was excellent.

Eating Patterns:

Meal Timing: Good ✓
- Breakfast at 7:45 AM (ideal window)
- Lunch at 12:30 PM (peak Agni) ✓
- Dinner not yet logged

Meal Spacing: 4h 45m between meals ✓
Ideal spacing is 4-6 hours

Mindful Eating:
- Breakfast: Calm, seated ✓

```
• Lunch: Rushed, distracted ⚠️

  🍜 Ramen Bowl Analysis
  ──────────────────────────────

  [Food Photo]

  Agni Compatibility: 46/100
  ⚠️ Moderately Challenging

  Why: This meal is heavy (noodles,
  broth) and oily, requiring strong Agni
  to digest fully. Your current Agni
  (68%) may struggle slightly.

  Dosha Impact:
  • Increases Pitta (salty, heating)
  • Increases Kapha (heavy, oily)
  • Neutral for Vata

  Food Qualities:
  • Hot (temperature & energetics)
  • Heavy (hard to digest)
  • Oily (greasy broth)
  • Salty (high sodium)

  Timing: 12:30 PM
  ✓ Good - Agni is strong at midday
```

```
Recommendations:
• Walk 10-15 min after eating
• Ginger tea to aid digestion
• Lighter dinner tonight
• Avoid similar heavy meals today

✓ Ginger, cumin, cinnamon
✓ Cardamom, fennel
✓ Warming spices

Tastes to Favor:
Sweet, Sour, Salty

Foods to Reduce (Vata-Aggravating):

✗ Cold, raw foods
✗ Dry, light foods (crackers, chips)
✗ Bitter, astringent tastes
✗ Caffeine, alcohol
✗ Beans (except mung dal)
✗ Nightshades (tomato, potato, eggplant)

Also Consider (Secondary):

Your baseline Pitta needs cooling foods:
• Cucumber, cilantro, mint
• Coconut, ghee
• Sweet fruits

But right now, warming Vata balance is priority. Once Vata settles, we'll focus on Pitta cooling again.

Seasonal Adjustments:

It's winter (cold, dry) - naturally Vata-aggravating. Extra focus on:
• Warm soups and stews
• More healthy fats
• Warming spices

Weather Today:
Warm & humid - slightly Pitta-aggravating. Balance with cooling preparation styles but keep foods warm.

• Harder-to-digest foods OK here
• Include all 6 tastes

🌙 Dinner: 6-7 PM
Agni: 45-55% (declining)

What: Light, easy to digest
Size: Smallest meal (30-50% of lunch)
Examples:
• Soup or kitchari
• Steamed vegetables
• Light grains

Finish: At least 3 hours before bed

Meal Spacing:

Ideal: 4-6 hours between meals

Why: Gives Agni time to fully digest previous meal before adding more food. Snacking disrupts this process.

Your Current Pattern:
Breakfast → Lunch: 4h 45m ✓
Lunch → Dinner: Usually 6h ✓

Snacking Guidance:

Ideally: Avoid snacking

If needed (low energy, long gaps):
• Fresh fruit
• Soaked nuts (5-6 almonds)
• Warm milk with spices

Avoid: Processed snacks, cold drinks

Mindful Eating Practices:

✓ Eat in calm, seated environment
✓ No distractions (phone, TV, work)

```
✓ Chew thoroughly (20-30 times)
✓ Eat until 75% full
✓ Wait 5 min before seconds
✓ Express gratitude for food
✓ Short walk after meals (10-15 min)
