AyuAware Projects Section - Complete UI/UX Specification

Overview

The Projects section is where users embark on **Ayurvedic Health Transformation Journeys** - comprehensive, Twin-guided protocols for achieving specific health goals. Unlike generic goal trackers, Projects integrate constitutional assessment, multi-faceted Ayurvedic interventions, and measurable health outcomes.

Design Philosophy

Core Principles

1. **Constitutional Foundation**: Every project begins with understanding WHY this goal matters for this person's unique constitution
2. **Holistic Protocols**: Projects span diet, lifestyle, supplements, and practices - not isolated interventions
3. **Twin-Guided Journey**: The Digital Twin is an active coach, not a passive tracker
4. **Outcome-Focused**: Track health metrics, not just days completed
5. **Ayurvedic Framing**: Use traditional concepts (Nidra, Ama, Agni) alongside accessible language
6. **Sustainable Transformation**: Focus on root cause, not quick fixes

Step 2: Project Assessment

When user selects a project template:

```
← Back                    Nidra Optimization

[🪷 Twin Avatar]

  Before we begin, I need to understand your
  specific sleep challenges. This will help
  me customize the protocol for you.

──────────────────────────────────────────

🌙 SLEEP ASSESSMENT

What's your primary sleep challenge?

○ Difficulty falling asleep
○ Waking up during the night
○ Waking too early
○ Not feeling rested despite sleeping
○ Inconsistent sleep schedule
○ Multiple issues

──────────────────────────────────────────

How long have you experienced this?

○ Less than 2 weeks (acute)
○ 2 weeks - 3 months (short-term)
○ More than 3 months (chronic)

──────────────────────────────────────────
```

```
What time do you typically:

Go to bed:     [  10:30 PM  ▼]
Wake up:       [   7:00 AM  ▼]
Ideal wake:    [   6:00 AM  ▼]

──────────────────────────────────────────

What have you tried? (Select all that apply)

☐ Melatonin or sleep supplements
☐ Reducing screen time
☐ Meditation or relaxation
☐ Sleep tracking devices
☐ Prescription medication
☐ Nothing yet

──────────────────────────────────────────

Any additional context? (Optional)

  I travel frequently for work and my
  schedule is irregular...

[🪷 Twin Avatar]

  Based on your assessment, I've created a
  personalized Nidra Protocol.

  Your difficulty falling asleep combined
  with your Vata elevation suggests an
  overactive mind at bedtime. We'll focus
  on calming Vata through grounding evening
```

routines and specific herbs.

🌙 YOUR NIDRA OPTIMIZATION PROTOCOL

Duration: ~30 days (adjustable)
Intensity: Moderate
Focus: Vata-calming sleep restoration

PROTOCOL COMPONENTS

🌿 Lifestyle Adjustments
- Evening wind-down routine
- Screen curfew 2 hours before bed
- Consistent sleep/wake times
- Foot massage with warm oil
- Bedroom environment optimization

🍽️ Dietary Adjustments
- Warm milk with nutmeg before bed
- Earlier, lighter dinners
- Avoid stimulants after 2 PM
- Grounding foods in evening

💊 Supplement Support
- Ashwagandha (evening)
- Brahmi (optional, for racing mind)
- Tagara (Valerian) if needed

🧘 Practices
- Nadi Shodhana before bed
- Body scan meditation
- Yoga Nidra sessions

EXPECTED OUTCOMES

Week 1-2: Establishing routine, initial improvements in sleep onset

```
Week 2-3: Deeper sleep, less waking,
          more consistent schedule

Week 3-4: Sustainable sleep patterns,
          improved daytime energy
```

⚠️ COMMITMENT CHECK

```
This protocol requires daily attention for
best results. Are you ready to commit to:

☑ Evening routine (20-30 min daily)
☑ Dietary adjustments
☑ Regular check-ins with me

I recommend starting on a Sunday or Monday
when you can establish the routine.

Implementation Priority

1. **Phase 1**: Rename to Projects, add Ayurvedic framing to existing goals
2. **Phase 2**: Build project assessment flow
3. **Phase 3**: Create protocol template library
4. **Phase 4**: Add health metric integration
5. **Phase 5**: Build completion/graduation flow
6. **Phase 6**: Add Twin coaching intelligence

This specification should be read alongside other section specifications for complete context on the chat-first interaction patterns and integration points.
