AyuAware My Twin Section - Hybrid Chat + Card Design

Visual Design Specification

Design Philosophy

The Perfect Hybrid:

- **Chat = Conversational Guide** - Twin explains, introduces, and responds
- **Cards = Information Exhibits** - Dense, scannable, interactive data displays
- **Result = Human + Data** - Warm personality meets rich information architecture

Principles:

1. **Twin Speaks First** - Chat message introduces what's coming
2. **Card Shows Details** - Visual, scannable information display
3. **Expandable on Demand** - Collapsed by default, rich detail on tap
4. **Actions Always Available** - CTAs embedded in cards
5. **Conversational Flow** - Feels like Twin is showing you things, not just displaying data

Core Pattern

```
[Twin Message] - "Let me show you..."
    ↓
[Card] - Dense, scannable information
    ↓
[Expandable Section] - Tap to dive deeper
    ↓
[Actions] - What you can do with this info
```

```

🔍 Patterns Discovered

127 patterns learned from your data

☕ Coffee after 2pm → -20% sleep 92%

Category: Sleep
Observed: 23 times over 45 days

Details:
When you drink coffee after 2pm, your sleep quality drops significantly, with reduced REM cycles and increased wake-ups.

[Create Protocol] [See Timeline]

🍽️ Heavy lunch → Energy crash 88%

Category: Energy
Observed: 18 times over 45 days

Details:
Kapha-heavy lunches (dairy, bread) consistently lead to afternoon energy crashes between 2-4pm.

[Create Protocol] [See Timeline]

🌕 Full moon → Pitta & mood shift 85%

Category: Mood
Observed: 3 times (lunar cycles)

Details:
During full moon periods, your Pitta increases, leading to restlessness and mood fluctuations.

```
[Create Protocol] [See Timeline]

Additional Patterns:
──────────────────────────────────────

• Morning yoga → +25% day energy        91%
• Screen time after 10pm → Restless     89%
• Spicy dinner → Heartburn              87%
• Meditation → -30% stress              86%

[View All 127 Patterns →]  [Collapse ↑]

```

Expanded Predictions Card

```
🔮 Upcoming Predictions (3)
═══════════════════════════

⚠️ Tomorrow, 2pm                [87%]

Digestive discomfort likely

Why I'm predicting this:
• Full moon phase (Pitta aggravating)
• Hot weather forecast (28°C)
• Your spicy lunch tendency on Fridays

Prevention tips:
• Skip the spicy food tomorrow
• Have cooling lunch (salad, mint tea)
• Take a short walk after eating

[Create Prevention Protocol]

⚠️ In 3 days                    [78%]

Stress spike likely
```

Why I'm predicting this:
- Meeting-heavy calendar day
- Low sleep debt this week
- Historical pattern on Mondays

Prevention tips:
- Schedule morning meditation
- Block lunch break (don't skip)
- Prepare calming evening routine

[Create Prevention Protocol]

⚠️ In 5 days [65%]

Sleep disruption possible

Why I'm predicting this:
- Moon phase change
- Travel scheduled
- Pattern from last trip

Prevention tips:
- Pack sleep routine essentials
- Avoid caffeine after 12pm that day
- Bring familiar pillow/scent

[Create Prevention Protocol]

Accuracy Tracking:

Overall: 87% (↑22% from week 1)

Recent Predictions:
✅ Sleep disruption (Jan 25) - Correct
✅ Energy crash (Jan 23) - Correct
❌ Headache (Jan 20) - Didn't happen
✅ Digestive issue (Jan 18) - Correct

[View Prediction History →] [Collapse ↑]

```
╚═══════════════════════════════════════════════════════╝
```

Prediction Boxes:

- Severity color coding:
  - High (>80%): Orange border `#F8C471`
  - Medium (65-80%): Yellow border `#E89B7F`
  - Low (<65%): Blue border `#7AB8AC`

Visual Design System

Card Styling

Base Card:

```
background: #FFFFFF
border: 1.5px solid #E0EBE8
border-radius: 16px
padding: 20px
margin: 16px 0
box-shadow: 0 2px 8px rgba(0,0,0,0.06)
```

Card Header:

```
display: flex
align-items: center
gap: 12px
margin-bottom: 16px

icon: 22x22px
title: 16px, weight 600, color #1A2B26
divider: 2px solid #E0EBE8
```

Expandable Button:

```
width: 100%
padding: 8px 16px
text-align: center
font: 14px, weight 600
color: #4A9B8E
```

```
background: transparent
border: none

hover: background #F5F7F6
```

Expanded Content:

```
animation: height 400ms ease-out
           opacity 300ms 100ms ease-in
```

Information Density Levels

Level 1 - Collapsed (Scannable):

- Key metrics only
- 1-3 lines of text
- Single stat or status
- Height: ~120-150px

Level 2 - Expanded (Detailed):

- Full information
- Multiple sections
- Action buttons
- Height: Variable (400-800px)

Level 3 - Modal (Deep Dive):

- Tapping "View Details" buttons
- Full-screen experience
- Comprehensive data
- Charts and visualizations

Interaction Patterns

Card Expansion

User Action: Tap "View Details ↓"

Behavior:

1. Button text changes to "Collapse ↑"
2. Card height animates smoothly
3. Additional content fades in
4. Scroll position maintained
5. Other cards remain visible

Animation Timing:

- Height expansion: 400ms ease-out
- Content fade-in: 300ms delay
- Total: 700ms

Toggle Switches

Constitution Toggle (Prakriti/Vikriti):

- Smooth slide animation: 200ms
- Chart transitions: 400ms
- Data updates: Instant

Settings Toggles:

- Instant visual feedback
- Background save
- Toast confirmation

Embedded Actions

Within Cards:

- "Create Protocol" → Opens protocol builder
- "See Timeline" → Shows temporal chart
- "View History" → Full historical view

No Modals Unless Necessary:

- Most actions navigate to new views
- Keep user in flow
- Maintain context

Complete Flow Example

```
User Opens My Twin
    ↓
Twin Greets + Shows Learning Card (Collapsed)
    ↓
User Taps "What would you like to explore? → 🧬 Your
constitution"
    ↓
Twin Responds with Message + Constitution Card (Collapsed)
    ↓
User Taps "See More Details ↓"
    ↓
Card Expands with Full Constitution Info + Imbalance Alert
    ↓
User Taps "View Balancing Protocol"
    ↓
Navigates to Protocol Screen (keeping Twin context)
```

Mobile Specifications

Spacing

- Screen margins: 16px
- Card padding: 20px
- Vertical spacing between cards: 16px

- Section spacing within cards: 16px

Typography

- Card titles: 16px, weight 600
- Body text: 15px, weight 400
- Small text: 13px, weight 400
- Button text: 14px, weight 600

Touch Targets

- Minimum: 44x44px
- Expand buttons: Full width, 44px height
- Toggle switches: 50x30px active area
- Radio buttons: 44x44px tap area

Desktop Adaptations

Layout

- Same card design
- Max width: 800px
- Centered layout
- Increased margins: 24px

Cards

- Slightly larger: padding 24px
- More horizontal space for content
- Side-by-side layouts where appropriate

Key Success Metrics

Good Hybrid Design When:

1. ✅ User can scan cards quickly (< 3 seconds per card)
2. ✅ Detailed information available on demand (1 tap)
3. ✅ Conversation feels natural, not robotic
4. ✅ Cards feel like Twin is "showing" not "displaying"
5. ✅ Actions are contextual and obvious
6. ✅ User never feels overwhelmed or lost
7. ✅ Information architecture is clear
8. ✅ Depth available without complexity

Development Priority

Phase 1 (MVP):

- Basic chat messages
- Collapsed cards (Constitution, Learning, Patterns)
- Simple expansion
- Basic settings

Phase 2:

- Full card expansion
- All customization options
- Predictions with prevention protocols
- Rich data visualizations

Phase 3:

- Interactive charts
- Historical trends
- Advanced analytics
- Practitioner sharing

This hybrid approach gives you:

- **Warmth** of conversation
- **Density** of information
- **Flexibility** to explore
- **Clarity** of purpose
- **Efficiency** of scanning
- **Depth** when needed

The Twin becomes both a companion and a dashboard - speaking to you naturally while showing you rich, actionable data.
